Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Detailed Action

Drawings Objection

The drawings are objected to because in Fig.2, reference numeral "108" (the one below "104") should read --118--.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Objection to the Specification

The disclosure is objected to because of the following informalities:

- (1) On page 5, line 18, "slizing" should read --slicing--.
- (2) On page 7, line 13, reference numeral "232" is not found in any drawings. It appears the reference numeral should read --230--.
- (3) On page 7, line 14, reference numeral "238" is not found in any drawings.

Appropriate correction is required.

Claims Objection

Claims 8 and 12-18 are objected to because of the following informalities:

- (1) In claim 8, line 2, "space" should read --spare--.
- (2) In claim 12, line 21, it appears "slide" should read --slider--.
- (3) In claim 16, line 2, "at least one notch" should read --the at least one notch-- since it refers to the one previously cited.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 112, first paragraph

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 11 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It is not clear exactly how the "C" shape wall of the second cutting element holder enables the second cutting element snap into the "C" shape.

Claims Rejection - 35 U.S.C. 112, second paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4, 5 and 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4 and 9, "the nub" and "the latch track" have no antecedent basis.

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-8 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Davis (U.S. Patent No. 5,890,290).

Davis discloses a utility knife (10) comprising a handle (12), a body (16), a grip (15), a first end (18), a second end (14), a first cutting element (26), a second cutting element (24), at least one notch (44), a gap (108), a slot (28), a first cutting element notch (defined between 112, 114, 116), means (112,114,116) for holding the first cutting element (26), and means (20) for moving the second cutting element (24) from at least one extended position to at least one retracted position as claimed.

Indication of Allowable Subject Matter

1. Claims 4, 5 and 9-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
2. Claims 12-18 are objected to for the objection as set forth, but would be allowable if amended to overcome the rejection.

Prior Art Citations

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harstad, Rand, Seymour, Tims, Jr., Bigler et al., Sterlacci, Pelletier and Davis '140 are cited as art of interest.
